PROFILE SUMMARY

Detail-oriented and analytical professional with hands-on experience in SQL, Python, and Power BI, specializing in data cleaning, exploratory data analysis, and data visualization. Proficient in using libraries such as Pandas and NumPy for data manipulation and analysis. Possesses a strong foundation in data science concepts including statistical analysis, machine learning techniques (regression and classification), and predictive modeling using tools like Scikit-learn. Passionate about transforming data into actionable insights and seeking an entry-level Data Analyst/Data Science role to drive data-driven decision-making.

TECHNICAL SKILLS

- **MS EXCEL:** Pivot table, Lookups Conditional Formatting, Data Validation.
 - **VISUALIZATION Tools:** Power BI Excel, Tableau.
 - **EDA:** Data Cleaning, Data Preprocessing, Data Transformation
 - **PROGRAMMING:** Python (Matplotlib, Seaborn, Numpy, Pandas), MySQL.
 - **MACHINE LEARNING:** Regression, Classification, Scikit-learn, model evaluation.
 - **DEEP LEARNING:** TensorFlow, PyTorch, Keras.
 - **SOFT SKILLS:** Teamwork, Time Management, Communication, Problem Solving.
-

PROJECTS

BANKING CUSTOMER ANALYSIS

- **Skills / Approach:** Data Analysis, Financial analysis, risk assessment, Predictive Modeling, KPI Visualization.
- Performed end-to-end data analysis by cleaning, preprocessing, and analyzing large datasets to identify patterns and trends. Applied statistical techniques and machine learning fundamentals to assess risk factors and performance metrics. Identified potential anomalies and inefficiencies using data-driven insights. Communicated findings through clear visualizations and dashboards to support data-driven decision-making.
- **Technologies Used:** Python, SQL, Excel, Power BI, Data Analysis, Data Visualization.

E-COMMERCE BUSINESS INSIGHTS

- **Skills / Approach:** Data Analysis, Financial analysis, risk assessment, Predictive Modeling, KPI Visualization.
- Performed end-to-end data analysis by cleaning, preprocessing, and analyzing large datasets to identify patterns and trends. Applied statistical techniques and machine learning fundamentals to assess risk factors and performance metrics. Identified potential anomalies and inefficiencies using data-driven insights. Communicated findings through clear visualizations and dashboards to support data-driven decision-making.
- **Technologies Used:** Python, SQL, Excel, Tableau, Data Analysis, Data Visualization

TAXI FARE PREDICTION USING MACHINE LEARNING

- **Skills / Approach:** Data Preprocessing, Feature Engineering, Regression Modeling, Predictive Analytics, Model Evaluation.
 - Developed a machine learning model to predict taxi fares based on trip details like pickup/drop coordinates, passenger count, distance, and time features. Performed data cleaning and handled missing values using Pandas and NumPy. Applied feature engineering by extracting hour, day, month, and weekday from the pickup datetime. Trained and evaluated models such as Linear Regression and Random Forest using Scikit-learn. Integrated the trained model with a Flask web application to provide real-time fare predictions.
 - **Technologies Used:** Python, Pandas, NumPy, Scikit-learn, Flask, Machine Learning, Predictive Analysis.
-

EDUCATION

Bachelor of Science in Computer Science
• Sree Muthukumaraswamy College

Jun 2022 - May 2025
CGPA: 7.5/10

CERTIFICATION

- Data Analytics & Data Science Certification – Zukun Academy (2026)
- PowerBI Hackathon Certification (2026)
